

Never trust any statistics you didn't forge yourself! (German proverb)

自分で改ざんしていない統計を決して
信じてはいけない。(ドイツの諺)

Writing is essential for any thesis or academic article, but what about data analysis and presentation? These issues fall in the area of statistics, and although many of us have to use statistics, some may not be aware of statistical fallacies and other problems. However, weak or even wrong data analysis/presentation might undermine one's arguments or lead to faulty conclusions. In this workshop, we will learn how to prevent common but severe mistakes when it comes to statistics.

Open to all graduate students, faculty and staff members of Nagoya University

Pursuing Clear & Convincing Ideas in Writing

Date 11th December, 2014 (Thursday)

Time 16:30 - 18:00
