<p>■授業の目的【英語】： The primary goal of this course is to foster logically sound research writing skills through learning how to build a clear thesis statement (central research claim) for a research paper and a convincing argument based on the thesis statement.</p>
<p>■授業の達成目標【日本語】： 英語版の説明文をご覧ください。</p>
<p>■授業の達成目標【英語】： This is a two-semester course exclusively designed for graduate students who are planning to write a research paper – e.g., dissertation, journal paper, conference paper, conference abstract, etc. Through a specially designed Research Writing Recipe, the course will offer you comprehensive knowledge with step-by-step guidance on how to write a research paper from scratch. You will be guided to accomplish the most important tasks in the research writing process, including (i) build a thesis statement that would make your research original and clear, (ii) develop the thesis statement into a logical argument that would make your paper convincing and compelling, (iii) strengthen the argument by anticipating and eliminating the potential counterarguments that challenge the core ideas of your research, (iv) develop the argument into a full-blown research paper through writing an appealing abstract and attractive introduction. The spring semester of the course will focus on (i) and (ii). The fall semester will focus on (iii) and (iv). For details about the lessons in each semester, see the course content below. All the lessons will be delivered in clearly spoken English, accompanied by simple and entertaining presentation materials that can be readily understood and enjoyed by everyone. After successfully completing the entire course, you should be in a good position to complete and submit your paper for publication.</p>
<p>■授業の内容や構成</p> <p>Students of this course will be divided into groups and are encouraged to have active discussions and interactions with the instructor and group members during the class. All the class activities will be conducted based on YOUR OWN RESEARCH! The fall semester will cover the following sessions:</p> <p>Lesson 1: Writing is Thinking again (Lecture) (Reintroduce the practical and constructive logical thinking skills for research writing.)</p> <p>Lesson 2: Writing an appealing abstract (Lecture) (How to write an informative abstract that can appeal to a wide audience.)</p> <p>Lesson 3: Present and discuss your abstract – 1 (Presentation and Discussion)</p> <p>Lesson 4: Present and discuss your abstract – 2 (Presentation and Discussion)</p> <p>Lesson 5: Writing an attractive introduction (Lecture) (How to write a high-quality introduction that is attractive and informative.)</p> <p>Lesson 6: Let’s write an introduction together (Group-work) (Learn from each other about the common elements and difficulties in an introduction.)</p> <p>Lesson 7: Present and discuss your introduction – 1 (Presentation and Discussion)</p> <p>Lesson 8: Present and discuss your introduction – 2 (Presentation and Discussion)</p> <p>Lesson 9: Advanced topics on thesis statement and logical argument (Lecture) (Study your thesis statement and logical argument from a different perspective.)</p> <p>Lesson 10: Counterargument (Lecture) (Understand what a counterargument is, and distinguish it from (i) disagreement and (ii) criticism.)</p>

Lesson 11: How to defend your thesis statement (Lecture)

(Understand the Premise of Defense through some fun logical exercises.)

Lesson 12: Strengthen your logical argument – 1 (Lecture and Group-work)

(Build a Premise of Defense to counter the potential counterargument.)

Lesson 13: Strengthen your logical argument – 2 (Discussion)

(A final look at the thesis statement and logical argument that you have built.)

Lesson 14: Finalization of your research (Lecture)

(How to write the Discussion and Limitation of your research paper.)

Lesson 15: Review, reflection, and course evaluation. (Discussion)

■教科書: For this course, the instructor has developed a special textbook called the Research Writing Recipe. It includes the step-by-step guide on how to (i) establish research originality and clarity, (ii) build a thesis statement, (iii) build a logical argument, (iv) write an appealing abstract and attractive introduction, etc. All these materials will be provided free of charge to full-time students of the course.

■課外学修等: Outside the course hours, all students are required to

(i) Complete the designated exercises in the Research Writing Recipe,

(ii) Have at least one tutorial session with the course instructor.

■注意事項: (i) This course will be conducted face-to-face unless otherwise instructed by the course instructor.

(ii) To apply for the course, you are required to complete the following steps:

(a) Send an email to the course instructor, with the reason(s) for taking this course.

(b) Upon receiving the approval from the course instructor, register the course.

<p>■授業の達成目標【英語】： This course will equip students with the necessary skills to compose a well-structured scientific paper, with the goal of applying the techniques to their own research projects. In this course, we will cover three main topics for students' research papers: How to 1) build a persuasive abstract, 2) write a good title, and 3) construct a well-structured cover letter. This class is mainly for students looking to publish or advance their research (e.g., conference proposal, dissertation, abstract, etc.) in English, although limited support for a research project in Japanese is also acceptable. Regardless, I strongly encourage students who are in the initial stages of their research to join as well.</p>
