

<b>Integrated Japanese 1</b>			
<b>Registration Code</b>	1a・1c: 0061111, 1b: 0061112	<b>Credits</b>	3.0
<b>Course Category</b>	Basic GE, Language I		
<b>Term (Semester) / Day / Period</b>	G-I (1st year, Fall Semester) / Mon., Wed., Thu. / 1 (8:45~10:15)		
<b>Instructor</b>	1a・1c: Tokuhiro 1b: Hajikano		
<b>Target Schools (Programs)</b>	Hu(J)・La(S)・Ec(S)・Sc(P・C・B)・En(C・Au)・Ag(B)		
<p><b>●Goals and Objectives of the Course</b> This course aims to provide a basic knowledge of Japanese which will enable students to function effectively in everyday life.</p> <p><b>●Course Prerequisites</b> Students are required to take a placement test before the beginning of the Fall semester. The course level is decided upon in consultation with teachers. Those students who register for this course should also register for the Japanese Language Seminar (Communication) 1 in the same semester.</p> <p><b>●Course Contents</b> ①Students will learn comprehensive Japanese, necessary to live both on and off campus. Each lesson will cover new grammar, expressions and vocabulary (including Hiragana, Katakana and Kanji). A short test will be given each lesson. ②Students are required to read textbooks (especially "Elementary Japanese 1 DAICHI Translation of the Main Text and Grammar Notes") as preparation for each lesson.</p> <p><b>●Evaluation methods</b> Attendance 30%, Class Participation 30%, Mid-term Examination and Final examination 40%</p> <p><b>●Notice for students</b> Students must maintain course attendance rates of 80% or higher and are required to take mid-term and final examination. Those who fail to meet these requirements will not earn credits. Students are not permitted to withdraw from this course for any reason after the registration. In general, in the case of absence, make-up tests and examinations will not be possible (except in the case of extenuating circumstances). Three late arrivals or early departures of 15 minutes or more will be regarded as a one-lesson absence.</p>

<b>Linear Algebra I</b>			
<b>Registration Code</b>	0061211	<b>Credits</b>	2.0
<b>Course Category</b>	Sciences Basic		
<b>Term (Semester) / Day / Period</b>	G-I (1st year, Fall Semester) / Mon. / 2 (10:30~12:00)		
<b>Instructor</b>	BACHMANN Henrik		
<b>Target Schools (Programs)</b>	Hu(J)·La(S)·Ec(S)·Sc(P·C·B)·En(C·Au)·Ag(B)		
<p>●<b>Objectives of the course</b>            Linearity one of the most fundamental concepts for the handling of quantities in current natural science. Indispensable in quantum mechanics &amp; relativity or fields like computer graphics &amp; machine learning, its use has spread across all branches of natural science and beyond.            Linear algebra, developed in the nineteenth century, is the mathematical theory of linearity. The first half of this one-year course focuses on techniques for manipulating systems of linear equations, and the application of these techniques to analytic geometry (in arbitrary dimensions). Emphasis is placed on the ability to think abstractly.</p> <p>●<b>Course Prerequisites</b>            No formal prerequisites. Some ability to manipulate systems of linear equations and understanding of elementary geometry will be useful for the understanding of the course material.</p> <p>●<b>Course Contents</b>            Linear systems, Gaussian elimination, matrices, vectors, linear maps, matrix multiplication, the inverse of a linear map, subspaces of <math>\mathbb{R}^n</math>, image and kernel, linear independence, bases, dimension, coordinates, orthogonal bases, the Gram–Schmidt algorithm, QR factorization, orthogonal complement, orthogonal maps, least square approximations.</p> <p>●<b>Evaluation methods</b>            There will be two main, written exams (which might be done online): midterm (30%) and final (40%). Additionally, there will be homework assignments (20%) and quizzes (10%). The grading scale will be A+, A, B, C, C-, F.  <b>The evaluation methods might change depending on the current covid-19 situation.</b></p> <p>Students do not need to submit a Course Withdrawal Form for course withdrawal. Anyone who does not attend the final exam will receive the grade “Absent”.</p> <p>●<b>Notice for students</b>            The Reference Book is available in the Main library and in the Science library (enough copies in total for all students). Additional helpful references will be presented at the beginning of the first lecture.            Every information will be available on the course homepage:  <a href="https://www.henrikbachmann.com/la1_2020.html">https://www.henrikbachmann.com/la1_2020.html</a>            Please check this page regularly for updates and for all materials.</p> <p>It is <i>strongly</i> recommended to also follow the course Mathematics Tutorial I b.</p>

## Fundamentals of Chemistry I

<b>Registration Code</b>	0061311	<b>Credits</b>	2.0
<b>Course Category</b>	Sciences Basic		
<b>Term (Semester) / Day / Period</b>	G-I (1st year, Fall Semester) / Mon. / 3 (13:00~14:30)		
<b>Instructor</b>	PHUNG Quan Manh		
<b>Target Schools (Programs)</b>	Sc(P·C·B)·En(C·Au)·Ag(B)		

● **Goals and Objectives of the Course**

The purpose of this course is to grasp what chemistry is all about and to learn important principles and facts in chemistry. The course begins with atomic structure, proceeds next to bonding and molecules, and further to bulk physical properties of substances.

● **Course Prerequisites:** None

● **Course Contents/Plan**

- 1 Chemical Tools: Experimentation and Measurement (Ch. 1)
- 2 Atoms, Molecules and Ions (Ch. 2)
- 3 Mass Relationships in Chemical Reactions (Ch. 3)
- 4 Reactions in Aqueous Solutions (Ch. 4)
- 5 **Discussion & Online Quiz (Chs. 1 – 4)**
- 6 Periodicity and the Electronic Structure of Atoms (Ch. 5)
- 7 Ionic Compounds: Periodic Trends and Bonding Theory (Ch. 6)
- 8 Covalent Bonds and Molecular Structure (Chs. 7–8)
- 9 Thermochemistry: Chemical Energy (Ch. 9)
- 10 **Discussion & Online Quiz (Chs. 5 – 9)**
- 11 Gases: Their Properties and Behavior (Ch. 10)
- 12 Liquids, Solids, and Phase Changes (Chs. 11–12)
- 13 Solutions and Their Properties (Ch. 13)
- 14 Pre-final Review
- 15 **FINAL EXAM (Chs. 1 – 13)**

● **Course Evaluation Methods**

Two online Quizzes: 50 points each. Final Exam (comprehensive): 200. Homework: 50. TOTAL: 350.  
Grade "S": 100-90% (315 or more points), "A": 89-80% (314 - 280 pts), "B": 79-70% (279 - 245 pts), "C": 69-60% (244 - 210 pts), "F": 59-0% (fewer than 210 pts).

- **Course Withdrawal**

**Yes.** The last day to withdraw without academic penalty is the last class day in November.

- **Criteria for "Absent" & "Fail" Grades**

The "Absent" grade is reserved for students that withdraw by last class day in November. After that day, a letter grade will be awarded based on grades earned from all assignments during the semester.

● **Notice for Students**

It is essential to sit in the quizzes and final exam during the scheduled class time. **There will be NO make-up exam.** In the event of a missed exam due to a serious illness, accident or family emergency, compelling **written** documentation of the reason for the absence will be required. If the reason is accepted, the final grade will be calculated from the appropriately weighted average from the rest of the exams. If the reason will be deemed insufficient, the absence will be unexcused, and zero points will be awarded for the missed exam.

**Attendance** is necessary for successful completion of this course. No points will be awarded for attending lectures, but attendance may be taken.

**Homework** is crucial for mastering new material and developing skills in applying concepts. Weekly homework will be either on paper or electronic. Homework is due at the beginning of class on the due date. **A general guideline says an average of 2 to 3 hours of study time per week is necessary for each 1 credit hour.**

**Quizzes and the final Exam** focus on problem solving, and exam questions will be similar to the homework problems. Quizzes and Exam grades will be posted in the Gradebook on the Course website before next class period.

**Cell phones** must be turned off during lecture.

<b>Fundamentals of Earth Science I</b>			
<b>Registration Code</b>	0061411	<b>Credits</b>	2.0
<b>Course Category</b>	Sciences Basic		
<b>Term (Semester) / Day / Period</b>	G-I (1st year, Fall Semester) / Mon. / 4 (14:45~16:15)		
<b>Instructor</b>	HUMBLET Marc Andre		
<b>Target Schools (Programs)</b>	Sc(P·C·B)·En(C·Au)·Ag(B)		
<p><b>●Goals and Objectives of the Course</b>            The study of planet Earth embraces a wide range of topics, from the formation of rocks to the evolution of life, from continental drift to the study of earthquakes and volcanoes. In this course, fundamental concepts of earth science will be covered. Students will be introduced to plate tectonics, the fundamental theory underlying the geological processes which have shaped the environment in which we live and continue to modify the landscape, from the slow, progressive uplift of mountains to violent earthquakes and volcanic eruptions. Students will learn how the Earth recycles matter and how minerals and rocks form and are transformed; how the age of rocks and geological events can be determined, which is central to earth science; how the Earth's geography has changed and how life has evolved during Earth's 4.5-billion-year history. Besides providing a basic and up-to-date knowledge of essential concepts of earth science, the aim of this course is to stimulate the interest and curiosity of students for the study of planet Earth and provoke questions, comments, and discussions about issues related to earth science.</p>			
<p><b>●Course Prerequisites</b>            None</p>			
<p><b>●Course Contents/Plan</b></p> <ol style="list-style-type: none"> <li>1. Earth Sciences: an introduction</li> <li>2. The solar system</li> <li>3. Plate tectonics</li> <li>4. Minerals: rock's elementary building blocks</li> <li>5. Rocks and rock cycle I: igneous rocks</li> <li>6. Rocks and rock cycle II: sedimentary rocks</li> <li>7. Rocks and rock cycle III: metamorphic rocks</li> <li>8. The age of rocks</li> <li>9. Earth history I: paleogeography</li> <li>10. Earth history II: origin and evolution of life</li> </ol>			
<p><b>●Course Evaluation Methods</b>            Online quizzes: 60%            Written essay: 30%            Oral presentation: 10%</p>			
<p>Students who enrolled in 2020 will be graded using the six-step A+, A, B, C, C-, and F grade evaluation system (A+: 100-95%, A: 94-80%, B: 79-70%, C: 69-65%, C-: 64-60%, F: 59 % or less).</p>			
<p>Students who enrolled in 2019 or before will be graded following the five-step S-A-B-C-F grade evaluation system (S: 90-100%, A: 80-89%, B: 70-79%, C:60-69%, F: 59-0%).</p>			
<p>A student will be given an "Absent" grade if he or she submits a Course Withdrawal Request by the 15<sup>th</sup> of November. This deadline does not apply to students who drop the class part-way through for an exceptional reason (e.g. illness, accident). Also, NUPACE students should check the deadline set by the NUPACE program for course withdrawal.</p>			
<p><b>●Notice for Students</b>            Lectures will be given online. The online Nagoya University Collaboration and Teaching Tools (NUCT) will be used to upload teaching material and organize quizzes.</p>			

<b>Textbook</b>	There is no required textbook for this course. Please refer to the recommended reading below for an additional source of information.

<p><b>●Goals and Objectives of the Course</b></p> <p><u>Goals</u> – Although American political influence is arguably on the decline in recent years, the US remains the closest thing to a hegemon in the international system. The inner workings of the American political system are also somewhat unique compared to other countries. This course aims to provide students with a basic understanding of how politics work in the US, explaining the legislative, executive and judicial processes, as well as discussing other major players in the American political system and some current political issues. This not only helps to understand the workings of one of the world's major powers, but can serve as a useful comparison to the political workings of other countries.</p> <p><u>Objectives</u></p> <p>Stemming from comparative politics, this course aims give students a broad understanding of American politics and the American political system. We will review the major political components of the US, including the executive, legislative and judicial branches of government, non-governmental actors, and cover some current events in the latter part of the course.</p> <p><b>●Course Prerequisites</b></p> <p>No prerequisites for this course are required. However, students should have a good command of the English language and come to class willing to discuss the week's topic.</p> <p><b>●Course Contents/Plan</b></p> <p>Week 1 – course introduction  Week 2 – origins of the US political system  Week 3 – US political culture  Week 4 – congress  Week 5 – the presidency  Week 6 – the courts  Week 7 – the bureaucracy  Week 8 – midterm evaluation  Week 9 – voting and elections  Week 10 – political parties  Week 11 – interest groups  Week 12 – the media  Week 13 – current issues #1: civil disobedience  Week 14 – current issues #2: the presidential election  Week 15 – concluding summary and evaluation</p> <p><b>●Course Evaluation Methods</b></p> <p>Participation – 10%  Weekly assignments – 30%  Midterm exam – 25%  Final exam – 35%  Course withdrawal is possible up to one month after class starts or by special permission from the instructor.</p> <p><b>●Notice for Students</b></p> <p>Information regarding the paper assignment will be distributed after the midterm evaluation.</p>

<p><b>●Objectives of the course</b> This course aims to provide a basic knowledge of Japanese which will enable students to function effectively in everyday life. It emphasizes oral practice utilizing the material students learned in Integrated Japanese 1. This course also aims to cover reading and writing of simple sentences. The textbooks are the same as Integrated Japanese 1.</p> <p><b>●Course Prerequisites</b> Students are required to take a placement test before the beginning of the Fall semester. The course level is decided upon in consultation with teachers. Those students who register for this course should also register for Integrated Japanese 1 in the same semester.</p> <p><b>●Course Contents</b> ①Each lesson will cover grammar, expressions and vocabulary learned in Integrated Japanese 1 and practiced in short skits. Reading and writing are also covered. A short test will be given each lesson. ②Students are required to read textbooks (especially "Elementary Japanese 1 DAICHI Translation of the Main Text and Grammar Notes") as preparation for each lesson.</p> <p><b>●Evaluation methods</b> Attendance 30%, Class Participation 30%, Mid-term Examination and Final examination 40%</p> <p><b>●Notice for students</b> Students must maintain course attendance rates of 80% or higher and are required to take mid-term and final examination. Those who fail to meet these requirements will not earn credits. Students are not permitted to withdraw from this course for any reason after the registration. In general, in the case of absence, make-up tests and examinations will not be possible (except in the case of extenuating circumstances). Three late arrivals or early departures of 15 minutes or more will be regarded as a one-lesson absence.</p>

<b>Fundamentals of Physics I</b>			
<b>Registration Code</b>	0062211	<b>Credits</b>	2.0
<b>Course Category</b>	Sciences Basic		
<b>Term (Semester) / Day / Period</b>	G-I (1st year, Fall Semester) / Tue. & Thu. / 2 (10:30~12:00)		
<b>Instructor</b>	SHIGEMORI Masaki		
<b>Target Schools (Programs)</b>	Sc(P·C·B)·En(C·Au)·Ag(B)		
<p><b>●Goals and Objectives of the Course</b> Fundamentals of Physics I (FP I) is the first of three lecture courses (FP I–III) designed to cover the basic classical physics to provide a firm foundation for learning science and engineering. This course introduces the concepts and laws of classical mechanics. Further topics in mechanics will be covered in FP II.</p> <p><b>●Course Prerequisites</b> Students without a good background in high school physics and basic calculus are advised to review those materials as soon as possible and would be expected to spend more time and effort for the course. This must be considered when deciding your course load. Students are expected to participate actively in class activities throughout the course.</p> <p><b>●Course Contents/Plan</b> The topics include kinematics, vectors, force and motion, energy, work and momentum, and are based on the following chapters in the textbook:  Chapter 2: Motion Along a Straight Line  Chapter 3: Vectors  Chapter 4: Motion in Two and Three Dimensions  Chapter 5: Force and Motion I  Chapter 6: Force and Motion II  Chapter 7: Kinetic Energy and Work  Chapter 8: Potential Energy and Conservation of Energy  Chapter 9: Center of Mass and Linear Momentum  Some examples of problem solving will be discussed in lectures, but the companion course, Fundamental Physics Tutorial Ia, is designed to develop students' problem solving skills.</p> <p><b>●Course Evaluation Methods</b> Class attendance is required. Absentees must give a valid reason (e.g. doctor's certificate). Students need to submit a Course Withdrawal Request Form when requesting course withdrawal. The "W" grade is reserved for students who withdraw just after the final exam. After that day, a letter grade will be awarded based on marks earned from all assessment during the semester.  Class attendance: 5%, Assignments: 25%, Exams (midterm and final): 70%.</p> <p><b>●Notice for Students</b> Concurrent registration of Fundamental Physics Tutorial Ia is strongly advised because it is necessary for mastering the content of the lectures.</p> <p><b>Related courses:</b> Calculus I &amp; II, Linear Algebra I &amp; II, Fundamentals of Physics II &amp; III.</p>

<b>Fundamentals of Physics II</b>			
<b>Registration Code</b>	0062212	<b>Credits</b>	2.0
<b>Course Category</b>	Sciences Basic		
<b>Term (Semester) / Day / Period</b>	G-I (1st year, Fall Semester) / Tue. & Thu. / 2 (10:30~12:00)		
<b>Instructor</b>	TAMA Florence Muriel		
<b>Target Schools (Programs)</b>	Sc(P·C·B)·En(C·Au)·Ag(B)		
<p>●<b>Goals and Objectives of the Course</b>  Physics is at the foundation of science and engineering. This is the second of a series of four courses that cover the fundamentals of physics. The first 2/3 of this course covers further topics in mechanics: equilibrium and elasticity, gravitation, oscillations and the remaining 1/3 of the course introduces thermal physics. Besides learning to solve problems within each topic, students will also learn to solve problems that cut across these topics.</p> <p>●<b>Course Prerequisites</b>  To take Fundamentals of Physics II, you must also enroll in Fundamentals of Physics I. (You cannot study Fundamentals of Physics II without taking Fundamentals of Physics I first.) -Note that this course commences after Fundamentals of Physics I; nevertheless, you must register for it during the normal registration period in the first few weeks of semester. -Concurrent registration for Fundamental Physics Tutorial is required. -Students are expected to participate actively in class activities throughout the course. Students without a good background in high school physics and basic calculus are expected to have to spend more time in this course and are advised to take this into consideration when deciding their course load.</p> <p>●<b>Course Contents/Plan</b>  Chapter 10: Rotation  Chapter 11: Rolling, Torque, and Angular Momentum  Chapter 12: Equilibrium  Chapter 13: Gravitation  Chapter 15: Oscillations  Chapter 18: Temperature, Heat, and the First Law of Thermodynamics  Chapter 19: The Kinetic Theory of Gases  Chapter 20: Entropy and the Second Law of Thermodynamics</p> <p>●<b>Course Evaluation Methods</b>  Class attendance is required. Absentees must give a valid reason (e.g. doctor's certificate). Students need to submit a Course Withdrawal Request Form when requesting course withdrawal. The "W" grade is reserved for students who withdraw just after the final exam. After that day, a letter grade will be awarded based on marks earned from all assessment during the semester.  Intermediate tests: 50%; Final Exam: 50%</p> <p>●<b>Notice for Students</b>  Students gain a functional understanding of introductory mechanics and thermal physics. They are able to solve problems that may cut across the topics and are able to appreciate the physics underlying their studies in other science and engineering disciplines. They are prepared for the next course in the series: Fundamentals of Physics III.</p> <p><b>Related courses:</b> Calculus I, Calculus II, Linear Algebra I, Linear Algebra II, Fundamentals of Physics I, III.</p>

<p><b>●Goals and Objectives of the Course</b>            The aim of this course is to deepen the understanding of calculus and to cultivate the ability to apply mathematical knowledge.            The course is mainly intended for students taking Calculus I. Students will have the opportunity to manipulate the various notions introduced during the lectures.</p> <p><b>●Course Prerequisites</b>            Some basic knowledge on calculus from high school is assumed, including differentiation and integration of polynomial functions.</p> <p><b>●Course Contents/Plan</b>            Exercises sheets will be provided each week before the tutorial, and will be available on the web site of the course. Homework will be due every week during the tutorial. Solutions to the exercises will then be posted on the web site.</p> <p><b>●Course Evaluation Methods</b>            The final grade will be determined by homework (50%) and quizzes (50%). The grading scale will be A+, A, B, C, C-, F. This course uses the course withdrawal system. It is necessary to submit a Course Withdrawal Request Form when the student has no intention of finishing the course during the semester.</p> <p><b>●Notice for Students</b>            Students are expected to read their notes, and to be familiar with the content of the lectures of Calculus I before each tutorial sessions.</p>

<b>Term (Semester) / Day / Period</b>	G-I (1 <sup>st</sup> year, Fall Semester) / Tue. / 4 (14:45~16:15)		
<b>Instructor</b>	BACHMANN Henrik		
<b>Target Schools (Programs)</b>	La(S)·Ec(S)		
<p>●<b>Objectives of the course</b> The aim of this course is to provide essential mathematical knowledge necessary to further study mathematics and other sciences at university level. The course is intended for students taking Linear algebra I.</p> <p>●<b>Course Prerequisites</b> High-school level mathematics.</p> <p>●<b>Course Contents</b> Linear systems, Gaussian elimination, matrices, vectors, linear maps, matrix multiplication, the inverse of a linear map, subspaces of <math>\mathbb{R}^n</math>, image and kernel, linear independence, bases, dimension, coordinates, orthogonal bases, the Gram–Schmidt algorithm, QR factorization, orthogonal complement, orthogonal maps, least square approximations.</p> <p>●<b>Evaluation methods</b> The assessment of this course coincides with the assessment of the course Linear Algebra I.</p> <p><i>Course withdrawal:</i> Any student who does not participate in the final exam will receive the grade “W”. It is not necessary to submit a course withdrawal request form.</p> <p>●<b>Notice for students</b> The reference book is available in the Main library and in the Science library (enough copies in total for all students).</p> <p>It is <i>strongly</i> recommended to register also to Linear algebra I.</p> <p>Every information will be available on the course homepage: <a href="https://www.henrikbachmann.com/la1_2020.html">https://www.henrikbachmann.com/la1_2020.html</a> Please check this page regularly for updates and for all materials.</p>

<p><b>●Goals and Objectives of the Course</b>            The goal of this course is to provide the basic training necessary for the kind of courageous intellectual endeavors espoused by the Nagoya University Academic Charter. To be more specific, the course will introduce students to the basic skills in academic reading, writing, and argumentation which collectively form the basis for critical thinking. Using film studies as a guiding framework, students will gain hands-on experiences in conducting textual close reading, finding primary and secondary sources, and engaging with existing ideas.            In accordance with the objectives for Liberal Arts and Sciences Education, this course aims to cultivate comprehensive thinking abilities, cosmopolitan commitment to acquiring a pluralistic understanding of the world, and to nurture a sense of intellectual curiosity that is formative for various academic disciplines. Through the reading assignments, students will explore the complex phenomenon of human migration and the various responses it has elicited from filmmakers, media industries, and critics and researchers.</p> <p><b>●Course Prerequisites</b>            There are no prerequisites for taking this course.            Students are expected, however, to have basic knowledge in academic composition</p> <p><b>●Course Contents/Plan</b>  <b>UNIT 1: Introduction to the Aesthetics of “Mobilities”</b>                W1                W2                W3  <b>UNIT 2: Historicizing Émigré and Immigrant Filmmakers</b>                W4: Summary and Evaluation (take home assignment)                W5                W6                W7  <b>UNIT 3: Debating the Aesthetics of Exile’s Cinema</b>                W8:                W9 Interim Summary and Evaluation (take home assignment)                W10 Interim Summary and Evaluation (presentation)                W11                W12  <b>UNIT 4: Recontextualizing Empire</b>                W13 Summary and Evaluation (peer-review exercise and draft)                W14                W15                W16 Summary and Evaluation (final paper and presentation)</p> <p><b>●Course Evaluation Methods</b>            95-100%=A+, 90-94=A, 80-89=B, 70-79=C, 60-69=C-, 0-59=F, Students do not need to submit a Course withdrawal Request Form for course withdrawal. Those who miss more than 4 weeks without valid excuses will receive an "W(Absent)" grade            Discussion participation - 15%; Paper 1 (Criticism Article) - 20%; Abstract 10% ; Final Paper Draft 5%; Peer Review 10% ; Final Paper 20%; Presentations 20%</p> <p><b>●Notice for Students</b>            Please be sure to check the NUCT class page for further updates</p>

<b>First Year Seminar A</b>			
<b>Registration Code</b>	0063213	<b>Credits</b>	2.0
<b>Course Category</b>	Basic GE, 1Y Seminar		
<b>Term (Semester) / Day / Period</b>	G-I (1st year, Fall Semester) / Wed. / 2 (10:30~12:00)		
<b>Instructor</b>	HUMBLET Marc Andre		
<b>Target Schools (Programs)</b>	Sc(P·C·B)·En(C·Au)·Ag(B)		
<p><b>•Goals and Objectives of the Course</b></p> <p>The seminar is divided into two parts. The first part provides tips on how to search for information and how to give an oral presentation. This is followed by a discussion centered on the definition of science and the difference between science and pseudoscience. A few lectures on coral reef ecosystems will serve as examples of how science can be communicated. The students will learn about the different kinds of reefs, the biology of corals and coral reefs, the factors controlling reef growth, the present-day threats on coral reefs, and the geological evolution of reefs. Students will also be able to examine hand-sized samples of coral reef limestones and observe thin sections under a microscope. During the second part of the seminar, the students will give two presentations each about any scientific subjects of their choice related to the marine or freshwater world. The fields covered can be as varied as underwater exploration technologies, marine biology, water in the solar system, hydroelectric energy... Each presentation is followed by a Q&amp;A session. Class participation is strongly encouraged.</p> <p>The basic objectives of this seminar are (1) to teach students how to search for scientific information, (2) to encourage critical thinking, (3) to improve presentation skills, (4) to nurture scientific curiosity, and (5) to promote exchange of ideas about various scientific topics.</p> <p><b>•Course Prerequisites</b></p> <p>None</p> <p><b>•Course Contents/Plan</b></p> <ol style="list-style-type: none"> <li>1. Introduction: tips on information search and oral presentation</li> <li>2. What is science?</li> <li>3. Science vs. pseudoscience</li> <li>4. Coral reefs: diversity, past evolution and future trends</li> <li>5. Lab session</li> <li>6. Oral presentations by students</li> </ol> <p><b>•Course Evaluation Methods</b></p> <p>The grading is based on class participation (30%) and oral presentations (70%).</p> <p>Students who enrolled in 2020 will be graded using the six-step A+, A, B, C, C-, and F grade evaluation system (A+: 100-95%, A: 94-80%, B: 79-70%, C: 69-65%, C-: 64-60%, F: 59% or less).</p> <p>Students who enrolled in 2019 or before will be graded following the five-step S-A-B-C-F grade evaluation system (S: 90-100%, A: 80-89%, B: 70-79%, C: 60-69%, F: 59-0%).</p> <p>A student will be given an "Absent" grade if he or she submits a Course Withdrawal Request by the 15<sup>th</sup> of November. This deadline does not apply to students who drop the class part-way through for an exceptional reason (e.g. illness, accident). Also, NUPACE students should check the deadline set by the NUPACE program for course withdrawal.</p>			

**•Notice for Students**

The seminar will be given online. The online Nagoya University Collaboration and Teaching Tools (NUCT) will be used to upload teaching material.

## Introduction to Intercultural Competence

<b>Registration Code</b>	0083481	<b>Credits</b>	2.0
<b>Course Category</b>	Open		
<b>Term (Semester) / Day / Period</b>	G-I (1 <sup>st</sup> year, Fall Semester) / Wed. / 4 (14:45~16:15)		
<b>Instructor</b>	KUSUMOTO Keiko		
<b>Target Schools (Programs)</b>	Hu(J)·La(S)·Ec(S)·Sc(P·C·B)·En(C·Au)·Ag(B)		

### ●Goals and Objectives of the Course

This course aims to 1) acquire knowledge and deepen their understanding of the important concepts of Intercultural Competence and 2) learn how to cultivate it in order to be able to communicate effectively in cross-cultural situations and to relate appropriately in a variety of cultural contexts.

### ●Course Prerequisites

Students should hold an English level equal or above of: TOEFL PBT 523, TOEFL iBT 70, IELTS 5.5, TOEIC 730. Maximum number of students: 20 (Students are required to attend the first class)  
Classroom: International Education and Exchange Centre (IEEC), Room 207

### ●Course Contents/Plan

In the first part of the course, students will learn the definition, model and components of Intercultural Competence. Important concepts such as culture, language, identity, prejudice, stereotypes, generalization, ethnocentrism, cultural relativism and etc will be explored in order to have a deeper understanding on the development of Intercultural Competence.

In the second part, students will be involved in discussions, group work and group presentations to develop each component of Intercultural Competence, deepen their understanding on the topics covered, and to learn their application in a real-world setting.

#### <Schedule>

Oct 7 (W1): Introduction to the course

Oct 14 (W2): Definition of Intercultural Competence

Oct 21 (W3): Intercultural Competence (model and components)

Oct 28 (W4): Defining Culture

Nov 4 (W5): Culture and Language

Nov 11 (W6): Identity

Nov 18 (W7): Prejudice, Stereotypes, Generalization

Nov 25 (W8): Ethnocentrism, Cultural Relativism

Dec 2 (W9): Verbal and Non-verbal communication

Dec 9 (W10): Developing IC (Knowledge)

Dec 16 (W11): Developing IC (Attitude)

Dec 23 (W12): Developing IC (Awareness)

Jan 13 (W13): Developing IC (Skills)

Jan 20 (W14): Presentations

Jan 27 (W15): Presentations

Feb 3 (W16): Presentations (extra day), Submission date of final report

### ●Course Evaluation Methods

Final report 50% (Final report can be written in either English or Japanese.), Presentation 30%, Participation and attendance 20%, Course withdrawal system applies. Students must submit a course withdrawal form to the course instructor no later than Friday, November 27.

### ●Notice for Students

Students are expected to read the provided materials before the class and engage actively in discussions with other students.

Basically the course will be given face-to-face. However this may be subject to change depending on Nagoya University's guidelines. Please contact the course instructor beforehand.

<b>Textbook</b>	Materials will be provided in class.
<b>Reference Book</b>	A reference material list will be provided in class.
<b>Reference website</b>	
<b>Message</b>	<p>This course is an introductory course about Intercultural Competence where basic concepts will be introduced and classes will be partially lecture-based teaching. However, it is expected that students discuss and express their opinion actively.</p> <p>For any questions please contact the course instructor, Keiko Kusumoto at : [REDACTED]</p>

<b>Introduction to Career Development Theory</b>			
<b>Registration Code</b>	0063511	<b>Credits</b>	2.0
<b>Course Category</b>	InterD Liberal		
<b>Term (Semester) / Day / Period</b>	G-I (1st year, Fall Semester) / Wed. / 5 (16:30~18:00)		
<b>Instructor</b>	NISHIYAMA Kiyohisa, SAKAI Nobuaki, ITO Akiko, LELEITO Emanuel		
<b>Target Schools (Programs)</b>	Hu(J)·La(S)·Ec(S)·Sc(P·C·B)·En(C·Au)·Ag(B)		
<p><b>●Objectives of the Course</b>            The objective of this course is to provide skill sets required for effective career development with brief introduction to working culture in Japan. You may need to know how to behave as a team member in a community such as companies, research institutions for effective career development. The skill sets introduced in this lecture includes thinking tools for problem solving and value creation.</p> <p>As the goal of this course, the participants of this course, through lecture and activities, will get fundamental understanding about strategies for how to define problems in complex situations for proposing reasonable solutions as well as notions about the advantages of international students.</p>			
<p><b>●Course Prerequisites</b>            No prerequisites, but the students are expected to proactively join the activities.</p>			
<p><b>●Course Content</b>            The participants will learn methodical part of this lecture through video contents with Q&amp;A session provided by the lecturer. At the first phase of this lecture, mind mapping, brain storming and KJ method will be introduced as an effective strategy for team working. Then, some methodologies for problem solving from VE (Value Engineering) and TRIZ will be introduced. The participants will be asked to analyze real problems and propose solutions with respect to the methodologies. At the end of this lecture, the students will be asked to make final presentation exploiting the skill sets introduced through the course.</p>			
<p><b>●Evaluation Methods</b>            Report assignments: 60%            Final presentation: 40%</p>			
<p><b>●Notice for Students</b></p> <ol style="list-style-type: none"> <li>1. In order to conduct activities and group work effectively, the class capacity is limited to a maximum of 20 students. Please ensure to attend the first class. If the number of students exceeds the stipulated class size, the course coordinator will advise students on registration policy.</li> <li>2. Students are required to have an assignment submission rate of 80% or higher. The students who do not satisfy the required submission rate will not be allowed to submit final presentation and will earn a 'fail'.</li> <li>3. Any instance of a student falsely presenting work that is not their own (e.g. plagiarism, cheating) is academic fraud and taken seriously by the University. Consequences may include failure of the assignment or course, suspension, or expulsion.</li> <li>4. Need to submit a Course Withdrawal Request Form when students have no intention of finishing a course during the semester.</li> </ol>			
<b>Textbook</b>	None. Course materials will be distributed in the class

## Special Mathematics Lecture (Mathematics for Machine Learning)

<b>Registration Code</b>	0063611	<b>Credits</b>	2.0
<b>Course Category</b>	Sciences Basic		
<b>Term (Semester) / Day / Period</b>	G-I (1st year, Fall Semester) / Wed. / 6 (18:15~19:45)		
<b>Instructor</b>	BACHMANN Henrik		
<b>Target Schools (Programs)</b>	Hu(J)·La(S)·Ec(S)·Sc(P·C·B)·En(C·Au)·Ag(B)		
<p><b>●Goals and Objectives of the Course</b> Machine learning became a popular and really broad field in recent years. Machine learning algorithms are used in a wide variety of applications, such as email filtering, computer vision, medicine, language translation, computer games, economic, etc.. The goal of this course is to give a brief introduction into machine learning with a focus on the mathematical tools used.</p> <p><b>●Course Prerequisites</b> Basic knowledge in Linear Algebra and Calculus is helpful. We will also do some programming in Python. Programming knowledge are useful but not necessary since a rough introduction to programming in Python will be part of the course. Motivated 1<sup>st</sup>-year students can also attend without these prerequisites if they contact the lecturer beforehand. Due to the programming part of the lecture, students should have (access to) a computer/laptop.</p> <p><b>●Course Contents/Plan</b> Overview of machine learning, Review Linear Algebra, Introduction to Probability, Programming &amp; doing mathematics in Python, (Linear) Regression, Support vector machines, k-means clustering, Neural networks, Deep learning.</p> <p>Please visit the course homepage for an updated version of the contents for this course.</p> <p><b>●Course Evaluation Methods</b> The final grade will be based on active participation during the lectures and on some written and programming tasks.</p> <p><b>●Notice for Students</b> Check the course homepage: <a href="https://www.henrikbachmann.com/mml_2020.html">https://www.henrikbachmann.com/mml_2020.html</a></p> <p>This course is an optional subject which does not count towards the number of credits required for graduation in any program at Nagoya University.</p>			
<b>Textbook</b>	Lecture notes will be created during the course.

## Advanced Japanese (Written Presentation) 2

<b>Registration Code</b>	0044113	<b>Credits</b>	2.0
<b>Course Category</b>	Basic GE, Language I		
<b>Term (Semester) / Day / Period</b>	G-I (1st year, Fall Semester) / Thu. / 1 (8:45~10:15)		
<b>Instructor</b>	NAGASAWA Itsuki		
<b>Target Schools (Programs)</b>	Hu(J)·La(S)·Ec(S)·Sc(P·C·B)·En(C·Au)·Ag(B)		
<b>For information on syllabus, please go to the following address. (In Japanese only)</b> <a href="http://www.ilas.nagoya-u.ac.jp/syllabus/syllabus2020/syllabus2020_new/syllabus-top.html">http://www.ilas.nagoya-u.ac.jp/syllabus/syllabus2020/syllabus2020_new/syllabus-top.html</a>			

## Biotechnology

<b>Registration Code</b>	0064311	<b>Credits</b>	2.0
<b>Course Category</b>	Sciences Liberal		
<b>Term (Semester) / Day / Period</b>	G-I (1st year, Fall Semester) / Thu. / 3 (13:00~14:30)		
<b>Instructor</b>	CARTAGENA Joyce Abad		
<b>Target Schools (Programs)</b>	Hu(J)·La(S)·Ec(S)·Sc(P·C·B)·En(C·Au)·Ag(B)		

**●Goals and Objectives of the Course**

1. To provide basic knowledge on biological processes that will help students understand the science behind the technologies
2. To present examples of actual technology used in the industry
3. To discuss the benefits and drawbacks of Biotechnology to humanity and the environment
4. To provide a venue for students to express their opinions regarding the issues related to Biotechnology

**●Course Prerequisites**

None

**●Course Contents/Plan**

- I. Introduction: The nature of Biotechnology
  1. Basic Science of Biotechnology
  2. Technologies and Tools in Biotechnology I
  3. Technologies and Tools in Biotechnology II
- II. Products of Biotechnology:
  1. Microbial Biotechnology
  2. Plant and Animal Biotechnology
  3. Aquatic Biotechnology and Bioremediation
  4. DNA Fingerprinting and Forensic Analysis
  5. Medical Biotechnology
- III. Biotechnology Regulations
- IV. Ethics and Biotechnology

**●Course Evaluation Methods**

Attendance and class participation 30%  
 Group presentation 20%

In-class work/homework 20%

Examination 30%

●**Notice for Students**

1. Course webpage

NUCT (Nagoya University Collaboration and Course Tools; <https://ct.nagoya-u.ac.jp/portal>) is an online system that will be used for this course. PowerPoint slides, other learning materials (such as videos, websites, etc.) and home works will be accessible through this page.

2. Attendance

In case of emergency or absence from class, students should contact the instructor as soon as possible either by email or phone.

3. Make-up exam

Make-up exams may be given on condition that the student can provide acceptable reasons for his/her absence.

4. Personal electronics policy

Personal electronic devices should not be visible or audible during class time.

5. Academic honesty and original work

Cheating and copying (including plagiarism) will not be tolerated in this class.

6. Course Withdrawal

Students who wish to withdraw from the course will have to submit a duly accomplished Course Withdrawal Request by November 19, 2020.

<b>Calculus I</b>			
<b>Registration Code</b>	0064511	<b>Credits</b>	2.0
<b>Course Category</b>	Sciences Basic		
<b>Term (Semester) / Day / Period</b>	G-I (1st year, Fall Semester) / Thu. / 5 (16:30~18:00)		
<b>Instructor</b>	RICHARD Serge		
<b>Target Schools (Programs)</b>	Hu(J)·La(S)·Ec(S)·Sc(P·C·B)·En(C·Au)·Ag(B)		
<p><b>●Goals and Objectives of the Course</b>            Analysis is the field of mathematics that describes and analyzes quantitative changes, and the central methods are differential and integral calculus. These methods are essential techniques in natural science, and have recently found increasing applications also in social sciences.            The aim of the first half of this one-year course is to provide a solid understanding of functions of one real variable. The students will become familiar with the various tools necessary for the analysis of such functions and for their applications.</p> <p><b>●Course Prerequisites</b>            Some basic knowledge on calculus from high school is assumed, including differentiation and integration of polynomial functions.</p> <p><b>●Course Contents/Plan</b>  <u>1. Limits and continuity:</u> Basic properties of limits of sequences and functions, continuous functions and their basic properties, maxima and minima, asymptotic properties of functions.  <u>2. Differentiation:</u> Basic properties of the derivative and its interpretation, mean value theorem, higher derivatives, Taylor series.  <u>3. Integration:</u> Riemann integral and its properties, improper integrals, the fundamental theorem of calculus.</p> <p><b>●Course Evaluation Methods</b>            The final grade will be determined by quizzes (30%), the midterm (30%) and a final exam (40%). The grading scale will be A+, A, B, C, C-, F. This course uses the course withdrawal system. It is necessary to submit a Course Withdrawal Request Form when the student has no intention of finishing the course during the semester.</p> <p><b>●Notice for Students</b>            Students are expected to read their notes, and to be familiar with the content of the previous lecture of Calculus I before attending the next lecture.</p>

<b>Comparative Studies of Cultures</b>			
<b>Registration Code</b>	0065411	<b>Credits</b>	2.0
<b>Course Category</b>	Arts Basic		
<b>Term (Semester) / Day / Period</b>	G-I (1st year, Fall Semester) / Fri. / 4 (14:45~16:16)		
<b>Instructor</b>	MC GEE Dylan Patrick		
<b>Target Schools (Programs)</b>	Hu (J)·La (S)·Ec (S)·Sc (P·C·B)·En (C·Au)·Ag (B)		
<p><b>●Goals and Objectives of the Course</b>            This course is a comparative survey of Japanese and Chinese visual storytelling, from the tenth century to the present. We will learn about the aesthetics and affects of different forms of visual media over time, technologies of writing, cultures of reception, and the many roles that manuscript/print/digital media has played as an agent of social change. We will also learn various theories and methods for interpreting visual narrative and consider how readers (as consumers and prosumers) have shaped the dynamics of storytelling over time. All required readings for this course will be in English translation, with some additional materials available in Chinese and Japanese. Prior background in East Asian Studies and/or Japanese and Chinese is recommended but not required.</p>			
<p><b>●Course Prerequisites</b>            There are no academic prerequisites for this class. However, in order to ensure an optimal learning experience, you are strongly encouraged to have the following:</p> <ul style="list-style-type: none"> <li>-- A desktop or laptop computer (smartphones not suited for online discussion and writing)</li> <li>-- Access to a quiet, private space with a reliable WIFI connection</li> <li>-- A working camera, microphone, and set of speakers (standard on most computers)</li> <li>-- A browser capable of opening PDF documents</li> <li>-- Capacity for viewing video lectures with file sizes of 500 MB or more</li> <li>-- An e-mail account that you check regularly (for communication and submission of final papers)</li> </ul>			
<p><b>●Course Contents/Plan</b>            Course content will be organized into fourteen individual modules, each focusing on a particular topic or theme. Note that between now and the start of the semester, the following topics are subject to slight modification:</p> <ul style="list-style-type: none"> <li>Module 1: Course Overview</li> <li>Module 2: Picture Scrolls</li> <li>Module 3: Medieval/Early Modern Books</li> <li>Module 4: Medieval/Early Modern Books</li> <li>Module 5: Early Manga and Manhwa</li> <li>Module 6: Children's Literature</li> <li>Module 7: Early Animation</li> <li>Module 8: Interwar and Wartime Magazines</li> <li>Module 9: Comicbooks (Lianhuanhua and Manga) during the 1970s and 1980s</li> <li>Module 10: Dojinshi and Fan Fiction</li> <li>Module 11: 1980s-1990s Video Games</li> <li>Module 12: Media Mix and Transmedia Storytelling</li> <li>Module 13: Webtoons and Web Manhwa</li> <li>Module 14: Digital Media and Participatory Culture</li> </ul>			
<p><b>●Course Evaluation Methods</b>  <i>Assessment in this course will be according to a contract system.</i> At the start of the semester, each student will be given a choice of three different learning tracks, each with a different set of tasks and learning objectives that will culminate in a fixed grade. Upon successfully meeting all the objectives in their chosen track, students will earn the grade they signed up for. Students who choose the General Education Track, for example, will earn a B after completing ten of the fourteen lesson modules and writing a brief paper on an assigned topic. Students on the Research Track, in contrast, will earn an A+/S after completing all fourteen lesson modules,</p>			

contributing to online discussion meetings, conducting self-directed research for their final paper, and giving an presentation based on their research topic. Specific details about the assessment schedule for each track can be viewed on the online version of the syllabus, which will be accessible starting on Friday, September 18th (see below for link).

**●Notice for Students**

Please note that due to the COVID-19 pandemic, the current plan is to offer an online version of this course on CANVAS (not the School of Economics account). *We will not be using NUCT.* If the university deems that it is safe for undergraduate students to attend lectures on campus (Alert Level 2 or lower), I will consider holding discussion meetings in person for students who would like to attend. *However, even in the event that we are able to hold in-class meetings, any student in the class will still be able to participate in this class entirely online if they prefer to do so.* If you are considering enrolling, or if you are still on the fence and would simply like to learn more about the course content, please visit the following signup sheet page on Google Docs so that I can send you an invitation to the course site:

<https://docs.google.com/forms/d/1ifn-wcHbDroG-vvFXkTNdxcjqkYRA8KT1MidS6jNPUO/edit>

If you cannot access Google Docs for whatever reason, you can also e-mail me for an invitation at:

████████████████████

Note that I will be opening the course site on Friday, September 18th. That way, you can view the online version of the syllabus, peruse the schedule of course readings, and even get a head start working on some of the lesson modules before the semester starts.

<b>Textbook</b>	No required textbook for purchase. All course readings will be made available on the first day of class.
<b>Reference Book</b>	A list of optional readings and reference materials will be made available on our course site.

<b>Special Lecture (Studium Generale I)</b>			
<b>Registration Code</b>	0065511	<b>Credits</b>	2.0
<b>Course Category</b>	InterD Liberal		
<b>Term (Semester) / Day / Period</b>	G-I (1st year, Fall Semester) / Fri. / 5 (16:30~18:00)		
<b>Instructor</b>	VASSILEVA Maria		
<b>Target Schools (Programs)</b>	Hu(J)・La(S)・Ec(S)・Sc(P・C・B)・En(C・Au)・Ag(B)		
<p><b>●Goals and Objectives of the Course</b>            The name “Studium Generale” means “General Studies” in Latin and was developed in old European universities, still used in many German universities. ストゥディウム・ゲネラーレとはヨーロッパで 800 年の伝統を持つ「開かれた大学」です。その理念に基づいた講義を体験することを狙う。様々なトピックで初心者にも分かりやすく噛み砕いた講義を英語で開講します。対象者は皆さんです！</p> <p><b>使用言語は英語。学内留学の気分!</b></p> <p><b>Goals:</b> Studium Generale focuses on “diversity”. Students are exposed to different ideas – from both the speakers and other participants. The course cultivates a multifaceted view of the world and communication skills, which are fundamental competencies for future members of the society.</p> <p><b>Objectives:</b> Students will increase their understanding and appreciation of wide range of scientific fields, as well as business, careers and arts topics. Students will gain experience discussing with participants from other majors and countries. Student develop these competencies while using English language.</p> <p><b>●Course Prerequisites</b>            No prior scientific knowledge in any field is required. Everyone is welcome!</p> <p><b>●Course Contents/Plan</b>            The format of the course includes talks by invited speakers and guided discussions among participants. A different invited speaker, from Nagoya University or elsewhere, gives each talk thus the content of each session is different.  <i>Videos of some previous talks may be seen on Nagoya University OCW page:</i>  <a href="http://ocw.nagoya-u.jp/index.php?lang=en&amp;mode=c&amp;id=624&amp;page_type=index">http://ocw.nagoya-u.jp/index.php?lang=en&amp;mode=c&amp;id=624&amp;page_type=index</a>  <i>Some lectures have been translated into Japanese and added to the NUAcL webpage:</i>  <a href="http://nuact.ilas.nagoya-u.ac.jp/ocw/index.html">http://nuact.ilas.nagoya-u.ac.jp/ocw/index.html</a></p> <p><b>THIS COURSE WILL BE CONDUCTED ONLINE.</b> Lectures will be provided as recorded videos. Discussion sessions will be live online. Exact schedule will be provided on the course NUCT site.</p> <p><b>●Course Evaluation Methods</b>            Written report for each lecture (70%); participation in discussion sessions (30%)            Each report should answer the provided questions and be several sentences long (report word count min 350 – max 2000). Grading criteria for reports: (1) understanding lecture content, (2) logical thinking and analysis of lecture content, (3) organization of text, and (4) English language usage.</p> <p><b>Withdrawal (W) grade:</b> Students who do not intent to complete the course need to submit a Course Withdrawal Form. This can be done at any time during the course. Students who register but never come to class will receive an W grade. この講義を最後まで履修しない場合には、履修取り下げ届を提出すること。この手続きは、授業期間中いつでも可能</p> <p><b>●Notice for Students</b>            1. Instructions for extracurricular learning: assignments (reports) completion will require lecture review and may involve independent small online research.</p>			

2. Note that this course is also an open course! Participants who are not undergraduate university students register through a separate course website. ILAS students do not need to register there. Participants registering for the Open Course (through the course website) follow separate requirements to receive a Certificate of Completion. These requirements DO NOT apply to ILAS students.

<b>Health and Sports Science : Practicum (Exercise and Sports II)</b>			
<b>Registration Code</b>	0021416	<b>Credits</b>	1.0
<b>Course Category</b>	Basic GE, Sports		
<b>Term (Semester) / Day / Period</b>	G-III (2nd year, Fall Semester) / Mon. / 4 (14:45~16:15)		
<b>Instructor</b>	KATAYAMA Keisho		
<b>Target Schools (Programs)</b>	Hu(J)·La(S)·Ec(S)·Sc(P·C·B)·En(P·C·Au)·Ag(B)		
<p><b>●Goals and Objectives of the Course</b>            This course promotes communication and leadership abilities through sports by teaching students how to manage their own health, while training them in the basic skills required for a lifetime of physical activity.            The objectivities of this class are to emphasize the development of fundamental BADMINTON skills, knowledge of game rules, and tactics of play. The students play mixed doubles. The students are expected to deepen their understanding of this game and also to communicate well with a partner in class.</p> <p><b>●Course Prerequisites</b>            The students' success in this class is extremely dependent on their ACTIVE participation and ON TIME attendance. The students are expected come to class ON TIME and READY to participate. The students missing more than FOUR classes for any reason (excused or unexcused) will fail the course. Any students who are disruptive, disrespectful, or not putting their effort into the class will also fail the course or have their attendance/participation grade reduced.</p> <p><b>●Dress Code and Equipment:</b> Comfortable SPORTSWEAR and INDOOR SPORTS SHOES must be worn. If the appropriate attire is not worn to this class, attendance will not be counted. The students who do not have enough clear eyesight, the use of contact lens is strongly recommended.</p> <p><b>●Course Contents/Plan</b>            1. An orientation session for incoming freshmen.            2. An orientation session for badminton class.            3. Fundamental skill training.            4. Adapted skill training.            5. Team offensive and defensives tactics.</p> <p><b>●Course Evaluation Methods</b>            Evaluated by the ATTENDANCE and active participation (70%), badminton skills and knowledge (20%), and communication skills (10%). The students missing more than FOUR classes for any reason (excused or unexcused) will fail the course. Any students who are disruptive, disrespectful, absent from class many times, or not participating fully in the class will also fail the course or have their attendance/participation grade reduced.            The course withdrawal system is available in this class. If students want to withdraw, they need to submit a Course Withdrawal Request Form to the instructor before the end of the 4th class (including the first orientation class). In principle, instructors may not give students a grade of "Withdrawal" without the submission of the Course Withdrawal Request Form. However, in the case of an avoidable reason, such as sickness, or no school attendance, the instructor may give a grade of "Withdrawal" based on their judgment.</p> <p><b>●Notice for Students:</b> The students MUST attend the first orientation class and BRING their photo (3x4 cm) for incoming freshmen. The details of this course will be explained in the first session. It is desirable that students should preparation to learn about basic rules and skills required in playing of badminton.</p>			
<b>Textbook</b>	The website about table tennis will be introduced in class if necessary.		
<b>Reference Book</b>	If necessary, the book will be introduced in class.		
<b>Reference website</b>	<a href="https://bwfbadminton.com/">https://bwfbadminton.com/</a>		
<b>Message</b>	Hope the students will be active participation in this class.

<b>Complex Analysis</b>			
<b>Registration Code</b>	0061531	<b>Credits</b>	2.0
<b>Course Category</b>	Sciences Basic		
<b>Term (Semester) / Day / Period</b>	G-III (2nd year, Fall Semester) / Mon. / 5 (16:30~18:00)		
<b>Instructor</b>	DARPOE Erik Olof		
<b>Target Schools (Programs)</b>	Sc(P·C·B)·En(P·C·Au)·Ag(B)		
<p>●<b>Goals and Objectives of the Course</b> To introduce the basic theory of analytic functions in a single complex variable.</p> <p>●<b>Course Prerequisites</b> A good command of calculus in one and several variables, as well as basic linear algebra, is indispensable to understand the content of this course. Prior knowledge of complex numbers will be helpful, but is not necessary.</p> <p>●<b>Course Contents/Plan</b>  <u>Complex numbers:</u> <i>The complex number system, properties of the complex numbers, Cartesian and polar form.</i>            The aim of this part is to get familiar with the complex number system.  <u>Analytic functions:</u> <i>Elementary functions, continuity, analytic functions, the Cauchy–Riemann equations, derivatives of analytic functions.</i>            The aim of this part is to get familiar with the concept of differentiability for complex functions. We will emphasize the link with functions from the real plane to itself.  <u>Integrals:</u> <i>Line integrals, Cauchy’s theorem, Cauchy’s integral formula.</i>            Complex line integrals have the noticeable property to be (under certain conditions) independent of the choice of the line between the end points. We will focus on the study of this behaviour.  <u>Residues:</u> <i>Power series and Laurent series, calculus of residues.</i>            Residue calculus is a powerful tool to evaluate in integrals along curves in the complex plane. We will study the underlying theory as well as applications.</p> <p>●<b>Course Evaluation Methods</b> Homework assignments and written examination.</p> <p><i>Course withdrawal:</i> Any student who does not participate in the final exam will receive the grade “Absent”. It is not necessary to submit a course withdrawal request form.</p> <p>●<b>Notice for Students</b></p>

<p><b>●Goals and Objectives of the Course</b>            To learn about the fundamental and technological aspects of various materials, including metals, semiconductors, polymers, composites, dielectrics, and magnets. The course begins with an introduction of the atomic and crystal structures of materials. The tools used to describe crystal structures will be presented. These topics constitute the first fundamental step towards the understanding of materials properties. The relationships that exist between the structural elements of materials (microscopic properties) and their properties and performance (macroscopic properties) will be emphasized throughout the lectures. The materials mechanical, electrical, thermal and magnetic properties will be discussed both fundamentally and technologically.</p> <p><b>●Course Prerequisites</b>            None</p> <p><b>●Course Contents/Plan</b>            Atomic Structure and Interatomic Bonding            Crystal Structures            Mechanical Properties            Electrical Properties            Thermal Properties            Magnetic Properties            Optical Properties</p> <p><b>●Course Evaluation Methods</b>            A student will be regarded as ABSENT if he is absent without valid reason from any scheduled tests. A student who wishes to be considered as ABSENT must contact the instructor until the end of the final examination. Several small tests will be implemented during the semester. Final presentations or reports (depending on University policy related to Covid-19 pandemic) will be evaluated at the end of the semester.            Tests: 75%; Presentations: 25%</p> <p><b>●Notice for Students</b>            Related courses: Fundamentals of Physics I, II, III &amp; IV, Fundamentals of Chemistry I            Key Words: Material, metal, crystal, structure, mechanical, thermal, electrical, optical, magnetic.</p>

<b>Instructor</b>	MCGINTY Sean Michael		
<b>Target Schools (Programs)</b>	Hu(J)·La(S)·Ec(S)		
<p><b>●Goals and Objectives of the Course</b></p> <p><b>Goals</b> The goal of this class is to introduce students to the craft of academic writing. Students will be able to apply the skills they learn in this class to writing essays in other courses in the fields of social sciences, arts and humanities in particular.</p> <p><b>Objectives</b> The primary objective of the course is to equip students with the necessary writing skills to complete their undergraduate education and prepare for more advanced levels of writing. Students will learn about choosing appropriate research topics, developing their argument, using sources, structuring sentences, paragraphs, and essays, engaging in proper notation, and capturing reader interest.</p> <p><b>●Course Prerequisites:</b> None</p> <p><b>●Course Contents/Plan</b> The course is structured as a mix of lectures, assignments and group activities which focus on the following specific topics:</p> <ol style="list-style-type: none"> <li>1. What is academic writing?</li> <li>2. Understanding an Assignment.</li> <li>3. Academic Integrity.</li> <li>4. Writing an Essay Map.</li> <li>5. Peer Review Activity.</li> <li>6. Choosing Sources and Methodology.</li> <li>7. Writing Introductions.</li> <li>8. Academic Language.</li> <li>9. Writing Paragraphs.</li> <li>10. Writing Conclusions.</li> </ol> <p><b>●Course Evaluation Methods</b></p> <p>The ultimate aim of the course is to have each student write a 10 page academic essay which will constitute 50% of the final grade. Throughout the course students will also complete a series of mini assignments related to that essay which will be worth the remaining 50% of the grade.</p> <p>50% Ongoing Assignments 50% Final Paper</p> <p>A student needs to submit a “Course Withdrawal Request Form” when he or she has no intention of finishing a course during the semester.</p> <p><b>●Notice for Students</b></p>			

<p>Due to Covid 19 related restrictions this year, this course will be conducted online which will necessitate some changes from the normal course. Lectures will be recorded and uploaded to the NUCT system, so please check that regularly (at least once per week). Assignments will also be distributed, and students must submit them, via the NUCT system. Additional live tutorial sessions will be conducted using ZOOM so that students can have some face to face interaction with the professor and go over the material covered in the recorded lectures. These will be scheduled after the course has started.</p>

## Immigration in Japan: A Socio-legal Perspective

<b>Registration Code</b>	0082481	<b>Credits</b>	2.0
<b>Course Category</b>	Open		
<b>Term (Semester) / Day / Period</b>	G-III (2nd year, Fall Semester) / Tue. / 4 (14:45~16:15)		
<b>Instructor</b>	ISHIKAWA Claudia		
<b>Target Schools (Programs)</b>	Hu(J)·La(S)·Ec(S)·Sc(P·C·B)·En(P·C·Au)·Ag(B)		

### ●Goals and Objectives of the Course

Objective:

This course aims to analyse the legal and social status of foreign nationals in Japan. Whilst it focuses, in particular, on the immigration law framework and policy developments in Japan, a comparison with the situation in students' home countries is also envisioned.

Goal:

Students will not only acquire a deeper understanding of international society; they are also expected to enhance their communication skills through discussion and presentations.

### ●Course Prerequisites

Students must be at least in the second year of their undergraduate studies, and possess the requisite English language ability to comprehend the course readings, participate in discussions, and give a presentation. Non-native English speakers should possess TOEFL iBT 70, IELTS 5.5, or TOEIC 730 at the minimum.

### ●Course Contents/Plan

This course aims to analyse the legal and social status of foreign nationals in Japan. It focuses on the immigration law framework, immigration policy, rights and protections afforded under domestic laws, and prospective developments pertaining to admission and residence. Time will also be devoted to discussing anti-terrorism and security measures, international marriage and families, as well as Japanese perceptions of foreigners.

Topics to be covered include:

1. Citizenship in Japan
2. Japan's Immigration Framework I: A Short History
3. Japan's Immigration Framework II: Relevant Laws and Ordinances
4. Assessment of Current Immigration Policy Developments
5. Foreign Crime, Terrorism, and Security Measures
6. Japan's Refugee Policy
7. Composition of Foreign Nationals in Japan
8. Foreign Workers
9. Foreign Nationals' Civil and Political Rights under Domestic Law
10. Foreign Nationals' Social and Economic Rights under Domestic Law
11. International Marriage and Families
12. Japanese Perception of Foreigners

Readings will be distributed by the class instructor.

### ●Course Evaluation Method

Attendance/Participation: 20%

Group Presentation: 30%

(Students will be asked to give presentations (approximately 20 minutes) in groups on a subject relevant to the topic covered in the week in which the presentation is scheduled.)

Essay (1,500-2,000 words, if written in English; 3,000-4,000 characters, if written in Japanese): 50%.

Course withdrawal is permitted, provided that a course withdrawal application form is submitted.

### ●Notice for Students

Provided that the situation revolving around COVID-19 continues to be stable, at least the first class of this course is expected to be held in a classroom setting. Students are asked to assemble in Room 207 of the International

Education and Exchange Centre at 14:45 on October 6.	
Any questions regarding the course should be addressed to Claudia Ishikawa at [REDACTED].	
<b>Textbook</b>	Not Applicable
<b>Reference Book</b>	Readings will be uploaded onto the relevant platform.
<b>Reference website</b>	
<b>Message</b>	Whilst this course has been designed for international students, Japanese students are very welcome! Moreover, as the course is interdisciplinary in nature, students from all Schools and Departments are encouraged to attend.

<b>Academic Japanese (Listening &amp; Presentation) I</b>			
<b>Registration Code</b>	0062631	<b>Credits</b>	1.5
<b>Course Category</b>	Basic GE, Language I		
<b>Term (Semester) / Day / Period</b>	G-III (2nd year, Fall Semester) / Tue. / 6 (18:15~19:45)

<b>Target Schools (Programs)</b>	Hu(J)·La(S)·Ec(S)·Sc(P·C·B)·En(P·C·Au)·Ag(B)		
<p><b>●Goals and Objectives of the Course</b>            In this course, students will acquire the skills to make academic presentations related to their research focus and formulate appropriate questions and answers regarding specific presentations. Class materials are designed for advanced students.</p> <p><b>●Course Prerequisites</b>            -Students are expected to participate actively in class activities throughout the course.</p> <p><b>●Course Contents/Plan</b>            The specific goals in “Academic Japanese (Listening &amp; Presentation) III” are to help the students (i) give presentation with an appropriate expression and style of the academic situation, and (ii) ask a question appropriately in specific presentation and answer definitely. The semester will cover the former half of the textbook as following:            Lesson 1: Listening practices            Lesson 2: Listening practices -part 1-1.            Lesson 3: Listening practices -part 1-2.            Lesson 4: Listening practices -part 2-1.            Lesson 5: Listening practices -part 2-2.            Lesson 6: Listening practices / making an outline of the presentation -part 1.            Lesson 7: Listening practices / making an outline of the presentation -part 2.            Lesson 8: Review.            Lesson 9: Listening practices / making an outline of the presentation -part 3.            Lesson 10: Listening practices / making an outline of the presentation -part 4.            Lesson 11: Listening practices / making an outline of the presentation -part 5.            Lesson 12: Student presentation -part 1.            Lesson 13: Student presentation -part 2.            Lesson 14: Review and discussion.            Lesson 15: Review, reflection, and course evaluation.</p> <p><b>●Course Evaluation Methods</b>            Students who need the course credits are required to meet the following conditions:  <b>Oral exam 20%, Listening exam 20%, Presentation and self-assessments 30%, Assignments 30% : TOTAL 100%</b>            *Students will be graded following the 5-step S-A-B-C-F grade evaluation system.            *Students can withdraw from this course if they submit a request by the end of November.            *If a student is absent from classes more than 4 times, his or her grade will be “Absent.”</p> <p><b>●Notice for Students</b>            - Students are required to prepare for the textbook by the second lesson.            - The first lesson of the course will commence on October 6, 2020.</p>

<b>Laboratory in Physics</b>			
<b>Registration Code</b>	0063331	<b>Credits</b>	1.5
<b>Course Category</b>	Sciences Basic		
<b>Term (Semester) / Day / Period</b>	G-III (2nd year, Fall Semester) /Wed./ 3 (13:00~14:30) & 4 (14:45~16:15)		
<b>Instructor</b>	NAKATSUKA Osamu, KIMURA Yasuhiro, GELLOZ Bernard Jacques, ISHIBASHI Kazunori, MORIHANA Kumiko		
<b>Target Schools (Programs)</b>	Sc(P·C·B)·En(P·C·Au)·Ag(B)		
<p>● <b>Goals and Objectives of the Course</b></p> <p>The goal of this course is to improve your understanding of the theory behind physical values and phenomena on the basis of measurements and observations, and to help you learn experimental techniques such as basics, methods, and principles of measurement by using various types of equipment.</p> <p>Through using measuring devices such as a micrometer, a voltmeter, or an oscilloscope in laboratory practices, students are to learn how to measure various physical quantities with uncertainties. Concurrently, practice assignments related to the experiments are given to facilitate understanding of data analysis and writing of reports. Those are the objectives of this course.</p> <p>There is a historical, intellectual, social, and technical background behind each subject covered in the experiments. The experimental equipment and methodologies covered in this course can be applied in the majority of fields related to natural science. Hence, students interested in physics as well as those majoring in other fields will discover the applicability of the lessons learned in their major through laboratory experiments performed in this class. Students are expected to learn from not only classroom lectures but also hands-on physics laboratory experiments, which constitute a fundamental academic skill required for future studies in their specific fields.</p> <p>● <b>Course Prerequisites</b></p> <p>It is preferable to take courses of Fundamentals of Physics, but is not required.</p> <p>● <b>Course Contents/Plan</b></p> <p>The course is comprised of two key parts:</p> <ol style="list-style-type: none"> <li>1. Lectures and exercises on the basics of measurements and analysis</li> <li>2. Experiments<sup>*1</sup> <ul style="list-style-type: none"> <li>+ Acceleration due to gravity    +Motion of electrons in magnetic field</li> <li>+ radiation and radioisotopes    +Wavelength of light measurement with diffracting grating</li> <li>+ Oscilloscope    +Resonance of electrical circuit    + Low temperature properties of materials</li> </ul> </li> </ol> <p><sup>*1</sup> Laboratory practices may be changed based on university alert category level.</p> <p><b>【Contingency Plans Under COVID-19 Pandemic】</b></p> <p>Based on Nagoya University Alert Categories, the format of lessons in the course may be altered.</p> <p>Under Category C (emergency) or Education Activities Level 4 or higher:</p> <p>No in-person lectures, exercises or laboratory practices given. Online lectures and video-on-demand lessons shall be given to facilitate hands-on experience of laboratory exercises. The course hours shall be reserved to take questions from students in real time.</p> <p>Under Category B (High Alert) or Education Activities Levels 2 or 3:</p>			

No in-person lectures and exercises may be given (online option only). Laboratory practices, however, may be given in person to those who prefer over online lessons; for the other, video-on-demand (online) lessons shall be given. Those who take the online lessons may ask questions during the course hours in real time.

Under Category A (Caution) or Education Activities Level 1 or lower:

In-person lectures, exercises, and laboratory practices may be given. For those who cannot participate in person, video-on-demand lessons shall be given (limited to those who cannot re-enter into Japan due to the restriction in immigration).

After each laboratory practices, students are to receive general feedback on the proper use of an equipment or handling of data. This substitutes the hands-on part of the course's objectives.

#### ●Course Evaluation Methods

Evaluation will be based on participation and reports. Students will have to submit a report at the end of each session unless otherwise instructed. Class attendance is a very important factor affecting the approval of the credit of this course because the physical laboratory experiment class lays emphasis on class attendance and laboratory work performance. Students who are absent more than two times or who submit a Course withdrawal Request shall receive an "Absence" grade<sup>\*2</sup>.

<sup>\*2</sup> Letter grade "W" (withdrawal) may be given to those who entered the university in April 2020 or thereafter.

#### ●Notice for Students

Students taking this course MUST attend the first class of this course to receive guidance and safety training in real time.

As noted earlier, participation in class is essential for learning laboratory practices. Practice makes it easy for attaining our goals and objectives. Hence, as extracurricular activities, students are to watch online videos (see Reference Website) to better prepare for laboratory practices in advance. While reports are generally prepared and handed in each class, some practices may require students to prepare and to submit a supplemental report. On average, students are to spend two to three hours outside the class to prepare for exercises and laboratory practices.

Lastly, students shall be notified of any announcement or course changes via NUCT. Please be advised that students are to check the course page on NUCT regularly.

<b>Thinking about Japanese Society in the 21<sup>st</sup> Century from Gender Perspectives</b>			
<b>Registration Code</b>	0064431	<b>Credits</b>	2.0
<b>Course Category</b>	InterD Liberal		
<b>Term (Semester) / Day / Period</b>	G-III (2nd year, Fall Semester) / Thu. / 4 (14:45~16:15)		
<b>Instructor</b>	SAEGUSA Mayumi		
<b>Target Schools (Programs)</b>	Hu(J)·La(S)·Ec(S)·Sc(P·C·B)·En(P·C·Au)·Ag(B)		
<p><b>●Goals and Objectives of the Course</b>            The goals of this course are 1) to introduce students to the basic concepts of gender studies, 2) to deepen students' understanding of a wide variety of gender issues in Japan and global society, 3) to encourage students to think from diversified standpoints and to take action to promote gender equality.            Throughout the course, we will question gender in multiple ways:</p> <ul style="list-style-type: none"> <li>• Why is it important to think issues from gender perspectives?</li> <li>• How do gendered structures of power and privilege operate?</li> <li>• How do we explain the sexual division of labor and the unequal status of women in society?</li> <li>• How do we explain toxic masculinity?</li> <li>• What can we as individuals do to promote gender equality?</li> </ul> <p>Objectives:</p> <ul style="list-style-type: none"> <li>• Develop a thorough understanding of gender-related issues</li> <li>• Analyze causes of gender inequality</li> <li>• Communicate effectively about gender issues in both writing and speech.</li> </ul>			
<p><b>●Course Prerequisites</b>            There are no prerequisites for this course.</p>			
<p><b>●Course Contents/Plan</b></p> <ul style="list-style-type: none"> <li>• What is gender equality?</li> <li>• Masculinity and femininity</li> <li>• Gender and politics</li> <li>• Gender and work</li> <li>• Love, Marriage, and Gender</li> <li>• Gender-based violence</li> <li>• Sexual Orientation and Gender Identity</li> <li>• Student Presentations</li> </ul>			
<p><b>●Course Evaluation Methods</b></p> <ul style="list-style-type: none"> <li>• Participation 30% (submission of comment sheets)</li> <li>• Mid-term Essay Exam 20%</li> <li>• Presentation 20%</li> <li>• Final Essay Exam 30%</li> </ul> <p>*Students need to submit a Course Withdrawal Request Form when requesting course withdrawal.</p>			
<p><b>●Notice for Students</b>            Everyone is welcome!</p>

## Special Lecture (Go in Japanese Culture)

<b>Registration Code</b>	0065431	<b>Credits</b>	1.0
<b>Course Category</b>	InterD Liberal		
<b>Term (Semester) / Day / Period</b>	G-III (2nd year, Fall Semester) / Fri. / 4 (14:45~16:15)		
<b>Instructor</b>	SHIGENO Yuki		
<b>Target Schools (Programs)</b>	Hu(J)·La(S)·Ec(S)·Sc(P·C·B)·En(P·C·Au)·Ag(B)		

### ●Goals and Objectives of the Course

The purpose of this lesson is to cultivate a rich humanity and cultivate comprehensive judgment ability regardless of the field of specialization. Students will learn Japanese traditional culture "Go" and deepen their mutual understanding through games.

### ●Course Prerequisites

No pre-requisites! Students from any background are eligible. The course is not designed for Go players, and suitable for students of wide background.

### ●Course Contents/Plan

Lesson 1: Introduction.  
History of "Go" and its diffusion in Japan.  
Go equipment.  
The rules of Go, part 1.  
"Capture Go" (9×9 board).  
Technical terms.  
Game-playing manners.

Lesson 5: International Go events in Japan.  
Middle game strategy.  
Individual games (13×13 board).

Lesson 2: Life of Go professional.  
The rules of Go, part 2.  
Ending a game.  
Individual games (9×9 board).

Lesson 6: Artificial intelligence and Go.  
End game strategy.  
Individual games (13×13 board).

Lesson 3: Diffusion of Go around world.  
The rules of Go, part 3.  
Individual games against the computer.  
Individual games (9×9 board).

Lesson 7: Lecture by a special guest speaker.  
Review of a game.  
Life and death.  
Individual games (19×19board).

Lesson 4: Perspectives on Go.  
Opening strategy (13×13 board).  
Individual games (13×13 board).

Lesson 8: Team games (19×19 board).  
Individual games (19×19 board).  
Summary and questions.

### ●Course Evaluation Methods

- Submission of a paper discussing either the cultural and historical aspects of Go.
- Lessons attendance rate.
- Number of games played during the lectures.
- Some quizzes will be held during the lectures. Students who miss more than 30% of the quizzes will not pass the course.

### ●Notice for Students

- To [make an account](#) to play Go on the Internet, [KGS \(The KGS Go server\)](#).
- If you wish to cancel the course, you will need the permission of the instructor.

<b>Textbook</b>	Go, A complete Introduction to the Game, by Cho Chikun Kiseido Publishing Company, 1997 ISBN: 978-4-906574-50-6
<b>Reference Book</b>	None
